THE COMPANY

Valter Alberici and Marc Herzstein, founders of Allied International S.R.L. Fittings and Flanges. Above: the Office Headquarters in Nibbiano Val Tidone, opened on September 5th 2004 and dedicated with cherished and fond memories to their mothers, Mrs. Luisa Maini Alberici and Mrs. Isabel Smith Herzstein.

Valter Alberici, President - CEO

Gianluigi Varesi, General Manager

Founded in 2000 by two well known business managers in the butt welding fittings sector, Valter Alberici and Marc Herzstein, with head offices in Nibbiano Val Tidone and warehousing in Castel San Giovanni (Piacenza, Italy), since its inception **Allied International** has rapidly become a one-stop solution and worldwide leader in distribution and stock management for all kinds of fittings, flanges, piping, studbolts, gaskets and special supplies for petrochemical, oil, gas and power industries for the production and transformation of energy.

Close co-operation with all Clients, 24,000 tonnes of 50,000 items available for prompt delivery, a staff of 100 skilled and motivated professionals, 100,000 sqm of warehouse and constant attention to the latest market trends and standard requirements are at the basis of the rapid growth and success of **Allied International** all over the world, increasingly oriented at guaranteeing the highest level of quality.

Allied International is part of **Allied Group**, with 47 subsidiaries and sales offices located in USA, Canada, France, UK, The Netherlands, Russia, Kazakhstan, Australia, China, India, Nigeria, UAE, Singapore, Japan and others coming in the near future.

These concrete results make **Allied International** a suitable and reliable business partner.

PRODUCTS & TARGET MARKETS

Commercial arm of **Allied International Group**, **Allied International** provides services and support to all the Group's manufacturing companies for sales, marketing, purchasing, expediting, customer services, QA, certification, accounting and co-ordination of packing and distribution all over the world.

Thanks to this company, Allied International Group is the only group in the buttwelding fittings sector to guarantee the complete cycle of production and distribution. The only group to adopt the concept of globalization as the founding philosophy of its business mindset.

Warehouse & Stock

Allied International offers from 24,000 tonnes of prompt stock over a range of carbon steel, alloy steel, stainless steel and non ferrous alloys including equal and reducing tees, crosses, concentric and eccentric reducers, caps, 90° and 45° long radius elbows, 180° long radius return bends, 90° short radius elbows, 180° short radius return bends, in all schedules according to ANSI B36.10 and ANSI B36.19 and up to schedule XXS and over, in sizes up to 120" NPS.

Manufacturing Standards include ASME B16.9 - B16.25; MSS-SP75-43; DIN 2605 - 2606 - 2615 - 2616 - 2617; BS 1640; GOST 17374 - 17375 - 17376 - 17377 - 17378 - 17379 - 17380.

ISO 9001 approved sources for flanges/valves in accordance with ASME B16.5 - B16.47 Series A & B; API 590 (lineblinds) - API 6D ASME B16.34 - BS4504 - 3293 (long weld necks).

Special Products include reducing elbows, barred tees, equal & reducing laterals, extruded header & manifolds, reinforcement saddles, split tees, launching & receiving traps, Y pieces, bends.

Market & Customers

Allied International supplies the world-leading engineering companies and the major projects in the field of production and transformation of energy for the sectors of:

Offshore & Subsea · Oil & Gas pipelines · Petrochemical · Thermal Power · Stock items for all sectors

It fully meets every demand with a widespread commercial network, product quality, dynamic staff. To get the best results all over the world.

THE NEW WAREHOUSE IN CASTEL SAN GIOVANNI

A new warehouse is part of the new plant in Castel San Giovanni (351,100 sqm total area). Aimed to support the manufacturing and distribution volume growth of the **Allied International Group** companies, the new facilities have been realized with the latest technologies (machinery and production/distribution processes) at worldwide level in the fittings industry. In respect of environmental protection and human rights.

ENTREPRENEURIAL CULTURE

CORPORATE VIDEO PRESENTATION

360° ENTREPRENEURIAL CULTURE

Allied International Group was founded in 2000 with a great project: to become a global organization able to impose its own leadership on the world markets, without however losing contact with its roots, which were nourished by professional and human historical values and by principles of substance, loyalty and community cohesion.

This aim has been achieved thanks to structural factors: the widening of the sales network as a firm philosophy of internationalization; the progressive growth in production sustained by technological innovation; the certificated quality of its products and, last but not least, the valuing of its human resources.

It is thanks to this intelligent fusion of excellence, this internal spirit and this propelling strength that the Group can sustain an exceptional pace of development, assert its identity, establish a cooperative and trusting relationship with its Clients.

These are the guidelines that underlie its entrepreneurial culture:

- **Focus on the Client**, establishing continuous interaction, founded on knowledge and trust, and give them our full attention, so that any request may be satisfied with a perfectly targeted product.
- **Pursue quality and innovation** through intense Research and Development, collaboration with top universities, in-depth market studies, continuous improvements in quality standards, confirmed by the highest-level international certifications.
- **Value our employees** within a working environment in which each person receives consideration and exercises their right to be listened to in teamwork. Preserve direct relationships that are less formal, but still maintain respect for individuals' roles, relationships nourished by regular meetings to decide on future strategies and renew the sharing of values.
- **Feel part of the area in which the company has its roots**, respecting the natural environment and human rights, supporting social projects to benefit the weaker segments of the population, sponsoring sporting, cultural and traditional folk events. Aim for a generally positive effect on the local area.
- **Foster coherent and transparent communication** both within the company, by means of its Intranet website, and outside it, by means of the company's Internet websites, attendance at trade fairs, editorial and advertising material in the most renowned publications of the sector, the Manual of Visual Identity which also guarantees formal consistency of visibility and agents' and managers' relational style.

It was this very 360° entrepreneurial culture that Ernst & Young wished to recognize in 2009 with the prestigious Award for Entrepreneurial Excellence presented to Valter Alberici, President of Allied International Group, nominated Entrepreneur of the Year in the Finance Section "for having created a Group able to assert itself on an international level in highly technological sectors, to the extent that it is the only manufacturer in Europe, and among the few worldwide, of some of the most delicate components which operate within nuclear reactors".

Tectubi Raccordi s.p.A.

Incorporated into **Allied International Group** in 2003, **Tectubi Raccordi S.p.A.** was the first Italian manufacturer of steel butt-weld pipe fittings and today remains the world-leading manufacturer for all types of butt-weld fittings to be used in each sector of the power production and transmission market:

Nuclear Power • Offshore and Subsea • Oil & Gas pipelines

Petrochemical • Thermal Power • Stock items for all sectors

Supplier to the most important engineering companies in the world, **Tectubi Raccordi** offers the market first-class reliable products and services both during and after sales. It can also comply with the Client's specific requirements and with all relevant specifications.

Thanks to the skilled manual ability and experience of its workers, together with continual technological innovations and investments, this company has obtained the major quality accreditations, such as ASME QSC as a material organization, ISO 9001:2008, TÜV AD 2000 MERKBLATT, GOST Russia and NNSA China.

A wide range of butt-weld fittings is produced in the plants in Italy:

- **Podenzano (Piacenza)**: seamless and welded elbows, tees, reducers, caps and special products up to 120".
- **Castel San Giovanni (Piacenza)**: seamless mandrel elbows up to 56" and fittings up to 120".
- **Calendasco (Piacenza)**: seamless and welded elbows produced by cold forming system up to 16" in stainless steel and special alloys.
- **Carbonara Scrivia (Alessandria)**: seamless and welded large-radius bends produced by hot induction (from 6" to 56") and cold bending (from 2" to 60") .
- **Schio (Vicenza)**: heavy wall welded pipes, longitudinally welded clad pipes, bi-metal lined pipes; outside diameter from 3" to 100"; wall thickness from 3 mm up to 60 mm; length up to 12 meters.

In addition, two new plants in **Castel San Giovanni, Italy** (due to open in 2012) and in **Tianjin, China** (already working) endowed with the latest technologies, will increase significantly the production capacity.

Tectubi Raccordi, which exports 90% of its production worldwide and in this way constantly compares itself with broad horizons, is not new to this principle of always looking to the future through research and innovation, while it is a historical company, which has its roots in the far-off 1950s.

GROUP COMPANY PROFILES

Tectubi Tianjin Fittings Co. Ltd.

In 1985, Allied USA had started its business in China supporting the then already established local market. Now in the 21st century, **Allied International Group** has strengthened its activities through **Tectubi Raccordi S.p.A.**, well known in China as a world leading high pressure fittings manufacturer and has successfully developed its market in not only the petrochemical and gas pipeline areas, but also aggressively in the booming power industry.

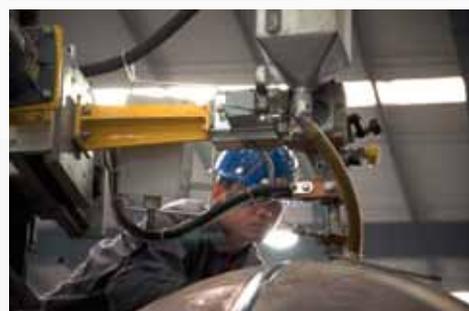

Now **Tectubi Raccordi** has constituted a newco **Tectubi Tianjin Fittings Co. Ltd.** in China, with an investment plan focused to suitably support new Chinese projects in the nuclear industry.

The new plant, which foresees the recruitment of 200 employees, has started the production cycle in 2011 and it will gradually be brought to a total production of 15,000 tonnes a year. The main products are hot finished, mandrel, seamless and butt welding fittings. The new plant, with a total surface of 68,000 sqm (covered 35,000 sqm), is located in the centre of Dongli Economic and Technological Development Area (DEDA) and will allow **Tectubi Tianjin Fittings** to be included in the Localization Program supported by the Chinese Government. In addition three sales offices have been opened in Beijing, Shanghai and Guangzhou, to better serve the Chinese market.

The factory is equipped with the most advanced equipment while all the “key” technical personnel have been trained in Italy.

Proximity with Chinese Clients and the combination of Italian expertise and Chinese production speed are the ingredients of a sure success. The long-term goal is to play a dominating role as the main supplier in critical services such as super critical thermal power plant operations, nuclear power plants, LNG terminals, gas pipelines, petrochemical and chemical industries, by establishing a warehouse to fulfil the objectives of a round-the-clock service commitment to Clients in China and through sharing the resources of the international Group production and warehouse resources.

Its market ideas: taking the Clients as our core, taking product quality as our vital point, taking honesty as our essence.

Raccordi Forgiati s.r.l.

Since its foundation in 1976, **Raccordi Forgiati** has been actively trading in and developing its position in the buttwelding fittings market and was incorporated into the Group early in 2005.

With its long history and experience, **Raccordi Forgiati** is extremely well known in its own right as a prestigious manufacturer, specialising in the full range of buttweld equal and reducing tees, concentric and eccentric reducers, and caps, in the size range from 1/2" NPS through 36" NPS, fully complementing and enhancing the Group's manufacturing ranges. Its considerable growth has not prevented **Raccordi Forgiati** from retaining an organisational structure that is indispensable in ensuring its renowned quality, delivery and service, supported by a considerable stock of basic materials, semi-finished and finished products.

As with the other Group manufacturing plants, **Raccordi Forgiati** independently holds the highest levels of quality approvals such as TÜV AD 2000 MERKBLATT and holds ISO 9001:2008 under Lloyd's accreditation. Since 1986 it has its own Design, Laboratory, Testing and Inspection facilities, independent of the other Group facilities, and an independent reference list detailing involvement in projects on a global basis, confirming it as a world class manufacturer in its range.

The main Clients therefore include the major global players in the oil, gas, and petrochemical industrial sectors, who have repeatedly shown their confidence in the choice of the diverse range of material grades from which **Raccordi Forgiati** manufactures its products. These have included from the carbon steel grades, suiting moderate, low temperature, high yield characteristics, through the alloy steel grades for elevated temperatures, to austenitic and ferritic/austenitic stainless steels, including duplex and superduplex, and beyond into the latest industry grades, including nickel base non ferrous alloys.

Located in Nibbiano and just 3 km from the Group headquarters in Vascellino, **Raccordi Forgiati** expands **Allied International Group** facilities with 6,000 sqm of covered production area and an additional 35,000 sqm (7,000 covered, 28,000 open) of yard and storage facilities.

GROUP COMPANY PROFILES

Allied International France SARL

Operating in Paris and Marseille, where was established in 2004, is a wholly owned subsidiary of **Allied International S.R.L.** With its staff of over 50 years' combined experience in the piping and fittings business, **Allied International France** focuses on the development of commercial activities involving all of the Group's resources.

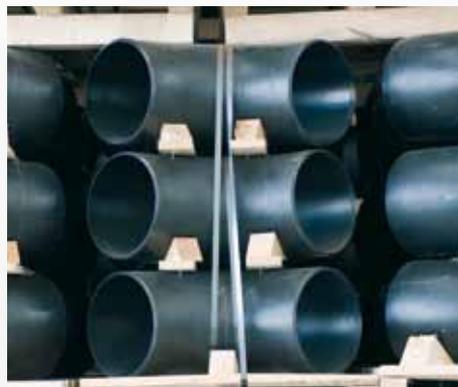

Naturally responsible for marketing and sales in the French domestic market, **Allied International France** combines logistical support to Group development both directly and particularly through co-ordination with **Allied International France** and its fittings production entities.

Allied International France has additional responsibility for developing sales with the main international Engineers and Contractors based in the major global locations or, for example, Paris, London, Tokyo and Yokohama, and for co-ordinating international projects between Italy's main offices and other **Allied International France** networks as well as developing sales on "package" business.

It is also ideally situated and positioned for the development of business in the Maghreb area.

As well as this sales and marketing responsibility, the globally experienced personnel in **Allied International France** co-ordinate the overseas outsourcing of the Group to service stockholding and package business, and are continuously involved in the active, direct audit of manufacturers and suppliers in the global supply chain.

Allied International France is a key hub in the Group's developing business.

Allied International UK Ltd.

Strategically positioned, and with extensive knowledge of the UK oil and gas sectors, **Allied International UK Ltd.** has strengthened its position particularly in the UK gas sector where it has achieved formal qualification in respect of national grid specification T/SP/B/12 for the manufacture and supply of 103 bar rated products, utilising the Group company facilities of **Tectubi Raccordi** and **Raccordi Forgiati**. The company is also approved by NG for supply of flanges to T/SP/F/1. In its own right, **Allied International UK Ltd.** is the holder of prestigious BSI Kitemark licences for products utilised in the UK gas sector steel pipeline system. These licences are in respect of independent gas distribution networks specifications GIS/F7:2006 and GIS/L2:2006 for butt weld fittings, flanges, and coated pipes as governed by these gas industry standards.

Located in Central Scotland where it is close to the major operational complexes of chemical and refining plants it occupies 6,700 sqm capacity including production facilities of 800 sqm and 2,300 sqm of fully racked warehouse storage. External yard facilities extend to 4,400 sqm.

Stock volume is some 3,000 tonnes and enables the company to continue to supply packages of pipe, butt weld fittings, ANSI/BS/EN flanges, class 3,000# screwed & socket weld fittings, branch outlets, gaskets, studbolts, MI & steel low pressure fittings, threaded pipes & nipples and ancillary products for the wider oil, gas, petrochemical, process, energy, and water sectors. Stocks are held in size range 1/2" to 48" sch std through sch xxs and pressure ratings 150 lb to 2,500 lb in carbon, low temperature and high yield steels.

2011 saw the opening of the new Aberdeen branch and warehouse, stocking an additional 1000 tonnes of material, specific to the offshore industry. Stocks are held up to 24" diameter in high pressure linepipe, butt weld fittings and flanges, supported by the main Group stocks in Grangemouth.

Allied International UK Ltd. manufactures many products outside Group production, including lineblind, spade, and spectacle blind flanges, and continues to manufacture non-standard bend angles in a wide range of diameters and now includes nipple manufacture in various materials and lengths with its machining, drilling and tapping facilities as available from in-house manufacturing and production facilities up to 48" (1,220 mm) NPS for tubular products.

The company offers extensive support to its Clients and is in its own right accredited by BSI to ISO 9001:2008. It is registered by Achilles Information on the Utilities Vendor Data Base (UVDB) to enable participation in utility sector projects, is similarly registered in the Achilles Verify Register in respect of SHEQ (safety, health, environmental, and quality) requirements, and is further registered under FPAL to enable participation particularly in the UK offshore sector.

GROUP COMPANY PROFILES

Tectubi Raccordi Abu Dhabi, UAE

Tectubi Raccordi Abu Dhabi is a representative office of the Italian mother company, a well-established leading manufacturer, to provide direct support for Middle Eastern Clients and projects. The office has a prestigious location managed by a resident manager, and was created in the knowledge that it can provide the energy market with products that are unique in terms of overall quality and excellence, in order to establish an even greater closeness with local Clients. **Tectubi Raccordi Abu Dhabi** has 3 main goals: official representation of **Tectubi Raccordi's** high quality Italian production and of the whole range of **Allied International Group's** stock items; enhancement of the business relationship and improved direct provision of any necessary support to Clients; acquisition of new Clients by means of targeted communication through sector publications, direct presentation of products and services to local companies and targeted meetings.

Allied The Netherlands bv

Allied The Netherlands is a sales office located in Dordrecht, aiming to meet all the expectations of the Dutch, Belgian and German market.

This area hosts numerous highly qualified trading engineering companies meeting the needs of projects located all over the world, with the supply of products aimed at the energy production and transformation market.

For this reason the presence and activity of **Allied The Netherlands** is highly strategic, because it interacts closely with these companies and covers the market needs, offering the whole range of **Allied International Group** high quality fittings and piping. With the aim to make this dialogue and the business relationship even more solid and satisfactory thanks to the quality and the quantity of the results.

Caspian Allied International too

Caspian Allied International is a new Kazakh trading company located in Aktau, Kazakhstan, on the Caspian Sea.

The newco is established on an area of 43,000 sqm, started with 2,000 sqm of covered area - to be increased in the future - and 400 sqm of offices.

Caspian Allied International serves the oil, gas and petrochemical industries as well as the energy and nuclear markets, supporting with a prompt delivery service all the projects implemented in the Caspian area and Central Asian region with all kinds of piping materials and equipment like fittings, pipes, flanges, bends, valves, welding electrodes, pig launchers and receivers, pig systems, coating materials, etc. It supplies all diameters of the above products and all kinds of materials from low temperature to high temperature service, including alloy and special alloy materials and also hard-to-find materials.

Caspian Allied International is able to satisfy the daily maintenance requirements of its Clients as well as any kind of new and/or customized project according to customers' needs, thanks to a stock of finished and unfinished goods. It takes care in fact of the full range of services: expediting, additional tests and inspection, packing, marking and transportation to the final destination.

Allied International Moscow, Russia

With huge natural reserves and a growing economy, Russia is obviously a strategic area of development for **Allied International**.

Allied International Moscow is a representative office of **Allied International**.

Located in Moscow, the main goal of this office is to support locally our existing Clients and to develop the business particularly for the oil & gas, refinery, power and nuclear markets. In a business environment with specific norms and requirements in terms of certification and documentation, our local presence allows **Allied International Moscow** to be a reliable supplier for both local and international projects in this area. Our skilled and experienced personnel with

strong Client focus is a key point that makes **Allied International Moscow** a global partner for fittings in Russia.

Allied International Tokyo, Japan

In order to consolidate its presence in the Far East, witnessing a rise of the business opportunities in the area, **Allied International** has opened a new commercial office in Tokyo where the main offices of the most accredited engineering companies are multiplying. The office will allow **Allied International** to greatly expand its market share in the Asian Pacific area, guaranteeing not only product quality, but also the commitment of a constant presence, creating a Client relationship built on trust, consideration, willingness and dialogue on a daily basis. With the positive effect of strengthening **Allied International's** position in the

petrochemical and gas markets, and the growth of the company in the sector of energy and its various applications.

Allied International Perth, Australia

Allied International is broadening its commercial network with the Perth sales office, in order to establish direct co-operation with Clients operating in the Pacific area, in the petrochemical and energy sectors. Its efficacy and uniqueness are based on the synergy of the commercial links with the producer, **Tectubi Raccordi** and **Tectubi Raccordi Bending Division**. This synergy guarantees to the Client not only prompt delivery, but also technical support, quality control and service, all in one go. This will speed up the relationship, supplying concrete answers and constant and direct assistance. In terms of

product quality, technology and experience, this is the most efficient response to the expectations of an area in such a state of ferment, rich in projects connected to the discovery of reserves, where the oil and natural gas market is expected to expand greatly.

Allied International Asia Pacific

Linking the Singapore, Tokyo and Perth offices, this new regional headquarters and sales office, based in Singapore, is part of **Allied International Group**. It gives the Group the chance to be present in an area where the sector's main international Clients are based. From Singapore it is much easier for **Allied International Asia Pacific** to gather and increase the opportunities that will be opening up in Malaysia, Korea, Indonesia, Brunei, Taiwan, Thailand, Vietnam, Burma, Laos, the Philippines. Areas to supply with a complete range of fittings in steel, stainless steel, high-yield steel, alloy and duplex, guaranteeing prompt delivery, as well as technical and logistic support to local orders. Here too there will be the whole cycle of

production, storage and sales, with all the advantage of the manufacturers **Raccordi Forgiati** and **Tectubi Raccordi's** amassed experience and technical skill on the commercial side making all the difference.
